

Fifth Annual

Thursday, April 1, 2010

**GREATER GULF STATE FAIRGROUNDS
MOBILE, AL**

Among the Educational topics available at this event will be:

A discussion of "ISNetworld Verification System"

Who should attend: Owners, Project Managers, and Estimators

This will be a discussion of ISNetworld and various other online pre-qualification programs that are being required of contractors.

The discussion is intended not only to inform Owners, Managers, and Estimators of what is being required with these programs, but also aid in the administrations of them. It will be beneficial to see the systems and gain a full understanding of what is required prior to bidding jobs at Owner Operator facilities that require this level of contractor evaluation.

Maritime Safety

Tom Littlepage an Authorized OSHA 5400 Maritime Trainer, will teach a course addressing "OSHA's Subpart B, Confined and Enclosed Spaces and Other Dangerous Atmospheres in Shipyard Employment" which is a logical and rational approach towards recognizing, evaluating and controlling these hazards in the Maritime Industry.
