

Mobile Section, AGC's Young Constructors' Forum (YCF) Helps Establish AGC Student Chapter at the University of South Alabama

The Young Constructors' Forum of Mobile Section, AGC recently hosted a BBQ on the grounds of the College of Engineering at USA in an effort to establish an AGC Student Chapter. Over 65 students from the College of Engineering - (Chemical, Civil, Electrical, Mechanical) and the Mitchell College of Business attended along with USA faculty and YCF members.

The students were enthusiastic about the formation of the Chapter which is being created primarily to help the students:

- **explore the career opportunities of the construction industry**
- **explore the principles and ideals of the construction industry;**
- **participate in activities that offer the opportunity to network with local construction and engineering firms (their potential employers);**
- **to form relationships which could lead to mentoring and employment opportunities with local construction and engineering firms.**

The association will be looking to all AGC and YCF members to help fulfill the goals of the Student Chapter.

Appreciation is extended to the Faculty and Staff of USA for working with AGC on this venture. AGC looks forward to working with USA in years to come.
